

1 This listing of claims will replace all prior versions, and listings, of claims
2 in the application.

3
4 **Listing of Claims:**

5
6 Claim 1 (Currently amended): A method of logging a computer system
7 user out of a server comprising the steps of:

8 receiving a selection of a logout link;
9 generating a logout page for display on a browser being used by the user;
10 causing a request for data from the server to be issued by the browser;
11 ~~expiring-clearing~~ cookies from the browser ~~in accordance with the request~~
12 by setting the cookies' values to nothing and the cookies' expire time to a past
13 date;

14 wherein the cookies include data provided to the browser by the server.

15
16 Claim 2 (Original): The method of claim 1 wherein the request further
17 causes the server to send an image to the browser which is indicative of successful
18 logout.

19
20 Claim 3 (Original): The method of claim 1 wherein multiple servers are
21 logged out of by selection of a single logout link.

22
23 Claim 4 (Original): The method of claim 3 wherein the logout link may be
24 located on any of the multiple servers and an authentication server.
25

1 Claim 5 (Original): The method of claim 3 wherein a visited sites cookie
2 maintains a list of all sites logged into by the user.

3
4 Claim 6 (Original): The method of claim 1 wherein selected cookies are
5 expired to log out of the server.

6
7 Claim 7 (Currently amended): A computer readable medium having a
8 program stored thereon for causing a computer to implement a method of logging a
9 computer system user out of a server comprising the steps of:

10 receiving a selection of a logout link;
11 generating a logout page for display on a browser being used by the user;
12 causing a request for data from the server to be issued by the browser,
13 wherein the request causes the server to ~~expire~~ clear cookies from the browser, by
14 setting the cookies' values to nothing and the cookies' expire time to a past date;
15 wherein the cookies include data provided to the browser by a server.

16
17 Claim 8 (Original): The computer readable medium of claim 7 wherein the
18 request further causes the server to send an image to the browser which is
19 indicative of successful logout.

20
21 Claim 9 (Original): The computer readable medium of claim 7 wherein
22 multiple servers are logged out of by selection of a single logout link.
23
24
25

1 Claim 10 (Currently amended): A method of logging a computer system
2 user out of multiple servers comprising:

3 receiving a request for a logout page;

4 providing a link to an expire cookies page on each server that when called
5 causes each server to ~~expire~~ clear cookies on ~~[[the]]~~ a user's browser by setting the
6 cookies' values to nothing and the cookies' expire time to a past date; and to
7 provide an image back to the browser upon succeeding in logging the user out,

8 wherein the cookies include data provided to the browsers from a
9 corresponding one of the servers.

10
11 Claim 11 (Currently amended): A system for logging a computer system
12 user out of multiple servers comprising:

13 means for receiving a request for a logout page; and

14 a module that provides a link to an expire cookies page on each server that
15 when called causes each server to ~~expire~~ clear cookies on ~~[[the]]~~ a user's browser
16 by setting the cookies' values to nothing and the cookies' expire time to a past
17 date, and to provide an image back to the browser upon succeeding in logging the
18 user out,

19 wherein the cookies include data provided to a browser from an associated
20 one of the servers, and

21 wherein further the data contains at least one of:

22 a date and time that the user is authenticated by an authentication
23 server,

24 a profile for the user, and
25

1 a list of sites visited by the user following a most recent logout from
2 the authentication server, wherein the sites include web servers.

3
4 Claim 12 (Previously presented): The system of claim 11 and further
5 comprising maintaining a list of servers that a user has logged into identified by
6 site ID.

7
8 Clam 13 (Previously presented): The system of claim 11 wherein a list of
9 servers is used to identify the link to each expire cookies page on each server.

10
11 Clam 14 (Previously presented): The system of claim 11 wherein the
12 request for a logout page can be initiated via different server pages.

13
14 Clam 15 (Currently amended): A computer readable medium having a
15 program stored thereon for causing a computer to implement a method of logging a
16 computer system user out of multiple servers comprising:

17 receiving a request for a logout page;

18 providing a link to an expire cookies page on each server that when called
19 causes each server to ~~expire~~ clear cookies on [[the]]a user's browser by setting the
20 cookies' values to nothing and the cookies' expire time to a past date, and to
21 provide an image back to the browser upon succeeding in logging the user out,

22 wherein the cookies include data provided to the browser from the server.
23
24
25

1 Clam 16 (Currently amended): A method of logging a computer system
2 user out of multiple servers comprising:

3 selecting a logout link from an affiliated server;

4 building a page containing an expire cookies URL;

5 sending requests to retrieve an image identified by each expire cookies
6 URL;

7 ~~retiring~~ clearing stored cookies by setting the cookies' values to nothing and
8 the cookies' expire time to a past date; and

9 receiving and displaying an image from multiple servers,

10 wherein the cookies include data provided to a browser from the server.

11
12 Clam 17 (Currently amended): A computer readable medium having a
13 program stored thereon for causing a computer to implement a method of logging a
14 computer system user out of multiple servers comprising:

15 selecting a logout link;

16 building a page containing an expire cookies URL;

17 sending requests to retrieve an image identified by each expire cookies
18 URL;

19 ~~retiring~~ clearing stored cookies by setting the cookies' values to nothing and
20 the cookies' expire time to a past date; and

21 receiving and displaying an image from multiple servers,

22 wherein the cookies include data provided to a browser from a
23 corresponding one of the servers.

1 Clam 18 (Currently amended): A method of logging out of multiple
2 domain servers on a network, the method performed by a browser comprising:
3 requesting a logout page from an authentication server;
4 receiving source image tags from the authentication server;
5 issuing get image requests to URLs identified by the image tags;
6 retiring-clearing cookies identified by responses to the get image requests,
7 wherein the clearing is by setting the cookies' values to nothing and the cookies'
8 expire time to a past date;; and
9 rendering an image received in responses from the domain servers,
10 wherein the cookies include data provided to a browser from the
11 authentication server.

12
13 Clam 19 (Previously presented): The method of claim 18 wherein the
14 image comprises a checkmark image.

15
16 Clam 20 (Original): The method of claim 18 wherein the image tag ensures
17 that the image will not be retrieved from cache.

18
19 Clam 21 (Original): The method of claim 18 wherein the image tag
20 includes a query.

21
22 Clam 22 (Original): The method of claim 18 wherein the domain servers
23 logged into are identified in a visited sites data structure.

1 Clam 23 (Original): The method of claim 22 wherein the data structure
2 comprises a cookie.

3
4 Clam 24 (Currently amended): A method of logging a computer system
5 user out of multiple servers comprising:

6 receiving a request for a logout page;
7 providing a link to an expire cookies page on each server in the form of an
8 image source tag that when called causes each server to ~~expire~~ clear cookies on
9 both the server and user's browser by setting the cookies' values to nothing and the
10 cookies' expire time to a past date, and to provide an image back to the browser
11 upon succeeding in logging out the user,

12 wherein the cookies include data provided to the browser from an
13 authentication server.

14
15 Clam 25 (Previously presented): The method of claim 24 wherein a data
16 structure of a visited site is maintained identifying the multiple servers that are
17 logged into.

18
19 Clam 26 (Original): The method of claim 24 wherein the request is initiated
20 by the selection of a logout link.

21
22 Clam 27 (Original): The method of claim 24 wherein the logout link may
23 be provided on one or more of the multiple servers logged into, an affiliated
24 server, and an authentication server.

1 Clam 28 (Original): The method of claim 24 wherein the cookies comprise
2 user personal information.

3
4 Clam 29 (Currently amended): A logout page for display on a browser
5 used to log a user out of multiple servers, the logout page comprising:

6 a plurality of image tags, each image tag corresponding to one of the
7 multiple servers;

8 each image tag providing a URL that causes a server associated with the
9 image tag to ~~expire~~ clear cookies by setting the cookies' values to nothing and the
10 cookies' expire time to a past date; and

11 each image tag forcing the browser to fetch the image from the associated
12 server,

13 wherein the cookies include data provided to a browser from an associated
14 one of the servers, and

15 wherein further the data contains at least one of:

16 a date and time that the user is authenticated by an authentication
17 server,

18 a profile for the user, and

19 a list of sites visited by the user following a most recent logout from
20 the authentication server, wherein the sites include web servers.

21
22 Clam 30 (Original): The logout page of claim 29 wherein each image tag
23 contains a query string parameter.

1 Clam 31 (Currently amended): A method of generating a logout page for
2 display on a browser used to log a user out of multiple servers, the method
3 comprising:

4 obtaining a visited sites data file which identifies each server logged into;
5 generating a plurality of image tags, each image tag corresponding to one of
6 the multiple servers;

7 providing a URL in each image tag that causes a server associated with the
8 image tag to ~~expire~~ clear cookies by setting the cookies' values to nothing and the
9 cookies' expire time to a past date,

10 wherein the cookies include data provided to a browser from an associated
11 one of the servers, and

12 wherein further the data contains at least one of:

13 a date and time that the user is authenticated by an authentication
14 server,

15 a profile for the user, and

16 a list of sites visited by the user following a most recent logout from
17 the authentication server, wherein the sites include web servers.

18
19 Clam 32 (Previously presented): The method of claim 31 wherein each
20 image tag contains a query string parameter causing the browser to fetch an image
21 from the associated server with the image tag with a separate transaction.

1 Clam 33 (Previously presented): The method of claim 1, wherein the data
2 contains at least one of:

3 a date and time that the user is authenticated by an authentication server,
4 and
5 a profile for the user.

6
7 Clam 34 (Previously presented): The computer-readable medium of claim
8 7, wherein the data contains at least one of:

9 a date and time that the user is authenticated by an authentication server,
10 a profile for the user, and
11 a list of sites visited by the user following a most recent logout from the
12 authentication server, wherein the sites include web servers.

13
14 Clam 35 (Previously presented): The method of claim 10, wherein the
15 data contains at least one of:

16 a date and time that the user is authenticated by an authentication server,
17 a profile for the user, and
18 a list of sites visited by the user following a most recent logout from the
19 authentication server, wherein the sites include web servers.

1 Clam 36 (Previously presented): The computer-readable medium of claim
2 15, wherein the data contains at least one of:
3 a date and time that the user is authenticated by an authentication server,
4 a profile for the user, and
5 a list of sites visited by the user following a most recent logout from the
6 authentication server, wherein the sites include web servers.

7
8 Clam 37 (Previously presented): The method of claim 16, wherein the
9 data contains at least one of:
10 a date and time that the user is authenticated by an authentication server,
11 a profile for the user, and
12 a list of sites visited by the user following a most recent logout from the
13 authentication server, wherein the sites include web servers.

14
15 Clam 38 (Previously presented): The computer-readable medium of claim
16 17, wherein the data contains at least one of:
17 a date and time that the user is authenticated by an authentication server,
18 a profile for the user, and
19 a list of sites visited by the user following a most recent logout from the
20 authentication server, wherein the sites include web servers.
21
22
23
24
25

1 Clam 39 (Previously presented): The method of claim 18, wherein the
2 data contains at least one of:

3 a date and time that the user is authenticated by an authentication server,
4 a profile for the user, and
5 a list of sites visited by the user following a most recent logout from the
6 authentication server, wherein the sites include web servers.

7
8 Clam 40 (Previously presented): The method of claim 24, wherein the
9 data contains at least one of:

10 a date and time that the user is authenticated by an authentication server,
11 a profile for the user, and
12 a list of sites visited by the user following a most recent logout from the
13 authentication server, wherein the sites include web servers.
